Asterisks password viewer free

29.10.2020 Windows Password Recovery v13.1 Support for TPM in Windows Hello Credential Explorer 22.09.2020 Wireless Password Recovery v6.3.0 Support for Nvidia 3xxx GPUs 21.08.2020 Reset Windows Password v9.8 Improved Password Recovery and Password Search Algorithms 07.8 08.2020 Wireless password recovery v6.2.9 Security fix Asterisk Logger v1.04 - Reveal/recover/monitor lost password behind asterisks (***) Copyright (c) 2003 - 2008 Nir Sofer BulletsPassView - Alternative to the Logger asterisk that also works under Windows Vista/7/2008. Mail PassView - Recover passwords stored in e-mail clients (Outlook, Windows Live Mail, Thunderbird, and so on). EssenPass - Retrieving the passwords of instant messenger applications. IE PassView - Retrieving Internet Explorer passwords. Dialupass - Retrieving VPN/RAS/Dialup passwords. Network Password Recovery - Recovering Windows XP/Vista Network Passwords (Credential File) Many applications, such as CuteFTP, CoffeeCup Free FTP, VNC, IncrediMail, Outlook Express, and others, allows you to type a password for its use in the application. The typed password does not appear on the screen, and instead of the actual password, you see an asterisk string (*****). This utility can reveal the passwords stored behind asterisks in standard password text boxes. Asterisk Logger is a successor to the AsterWin utility. It reveals asterisk passwords in the same way as the AsterWin utility, but has some advantages over the previous utility: You don't have to press a button to reveal the asterisk passwords. Each time a new window opens that contains a password box, Asterisk Logger automatically reveals the password within the password box and adds a record to the password list in the Asterisk Logger main window. Asterisk Logger displays additional information about the password revealed: The date/time the password was revealed, the name of the application containing the revealed password box, and the application executable file. Asterisk Logger allows you to store passwords in HTML file and in 3 types of text files. Note: This utility is outdated and does not work in Windows 7/2008/Vista. You can try the successor to this tool - BulletsPassView, which also works correctly in Windows 7/2008/Vista. Version 1.04: Fixed Error: The Main lost focus when the user switched to another application and then returned back to Asterisk Logger. Version 1.03: The configuration is now stored in a file instead of the registry. Version 1.02: Copy Selected Items now copies the items as a tab-delimited line. New option: Copy the password to the clipboard. Added support for Windows XP styles. Version 1.01 - Add support for translation into other languages. Versions 1.00 - First edition. This utility works correctly in Windows 9x, Windows ME, Windows 2000, and Windows XP. If you are working in Windows NT, you should download the .dll and place it in the system32 directory. If you don't download under Windows NT, the Asterisk Logger utility will correctly disclose asterisk passwords, but will not display information about the application that contains the passwords. If you want to reveal a password stored behind asterisks on a Pocket PC device, you can try the PocketAsterisk and RemotePocketAsterisk utilities. This utility works fine with most password text boxes, but there are some applications that do not store the password behind the asterisks in order to increase their security. In these cases, The Asterisk Logger will not be able to reveal the password. The following applications and operating system components do not store the password behind the asterisks: Mozilla/Firefox Dialup and network passwords in the Windows NT/2000/XP Windows 2000 user management tools. Asterisk Logger also can not reveal passwords on Internet Explorer web pages because they are stored differently than in other applications. If you want to reveal the passwords behind the asterisks in Internet Explorer, you can download the AsterWin IE utility. False alarm problems: Some antivirus programs detect Asterisk Logger utility as infected with Trojan/Virus. Click here to read more about false notifications in antivirus programs This utility is released as free software. You are allowed to freely distribute this utility via floppy disk, CD-ROM, Internet, or in any other way, as long as they do not charge anything for it. If you distribute this utility, you must include all files in the distribution package without any modification! The software is provided as HEI without any warranty, express or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose. The author will not be liable for any special, accidental, consequential or indirect damages due to data loss or for any other reason. In addition to Windows NT, this utility does not require any installation process or DLL add-ins. Just copy to executable in any folder you want and run it. In Windows NT, you can still use this utility without ADDITIONAL DLLs, but information about the application that contains the asterisk password will not be displayed. To display the application information in Windows NT, you must download the psapi .dll and place it in the system32 directory. If this file already exists on your system, you do not need to replace it. reveal passwords within asterisk text boxes, follow these instructions: Run the Asterisk Logger utility. The main window will appear, with no items in it. Open the windows that contain the asterisk text box that you want to reveal. The password will be revealed immediately within the password box, and in addition, a record containing the password and other information will be added to the main window of the asterisk Logger utility. After you reveal all the passwords you need, you can select the desired passwords in the main asterisk asterisk window and save them to text or HTML file. The Asterisk Logger utility also provides 2 additional options for use in special cases: Log Changes to the Box password: If this option is enabled, Asterisk Logger automatically detects all changes to the revealed password boxes, and each time it finds a change in the password, it will immediately add a new record to the password list, which contains the new modified password. This option may be useful for some applications, such as CuteFTP. When you open the CuteFTP site administrator, the password of the currently selected FTP component is revealed. To easily reveal the passwords of other items, check this option, and then scroll to all the items you want to get their password. Each time you move to a new item, the password will be added to the list in the Asterisk Logger main window. Duplicate password logging: This option is available only if the previous option is selected. If this option is selected, a modified password will be added even if it is identical to one of the previous passwords in the same password box. If you have any problem, suggestion, comment, or found an error in my utility, you can send a message to nirsofer@yahoo.com Asterisk Logger is also available in other languages. To change the language of Asterisk Logger, download the appropriate language zip file, extract the 'astlog_lng.ini', and put it in the same folder that you have installed Asterisk Logger utility. Password Viewer Asterisks is a software that allows you to see the actual password hidden behind the asterisks. Windows allows you to store passwords that you use frequently, such as passwords in Outlook Express e-mail or for an FTP connection. But since you no longer enter the saved password manually, you tend to forget them. The password is looking right at you, but hiding behind a number of asterisks - ****. This feature is intended to protect your passwords. but sometimes this feature becomes more of a pain than a help. Asterisk Password Viewer allows you to see the actual password behind the asterisks!
